

Survey for the Biology club

CCC Chinese School, 2019-2020 Academic Year

Attention I: The biology club will significantly change its focus and content in 2019-2020 academic year. It will shift to emphasize to attract students' interests in biological and medical sciences, so it becomes more suitable for students from 8th to 11th graders in the same classroom. The biology club will study scientific histories and stories on the greatest discoveries in biomedical sciences.

The textbook: *The story of life -Great Discoveries in Biology*, by Sean B. Carroll.

Additional topics will be selected by Professor Haijun Chen.

Attention II: The biology club **may** still host the USA Biology Olympiad (USABO) Open Exam in 2020, but it will not contain any teaching or training content on USABO in classroom. Students who are motivated to participate in the USABO in near future may contact Professor Chen for advice. Professor Chen may offer a very competitive and intensive USABO course on Saturday (3 hours per lesson; 24 or 25 lessons in six months), starting from August 24, 2019 to February 1, 2020.

Required Registration Information:

Name of Student:

School District:

Name of Parents:

Contact Phone#:

Contact Email:

Expectation of **Parent**:

Grade of Student in 2019-2020 (choose one): 8 9 10 11

Rank in school (choose one): Top 1%, 3%, 5%, 10%, 15%, 20%, and <20%.

Biology courses that Student has taken:

Chemistry courses that Student has taken:

Hours available per week to study biology:

Expectation of **Student**:

Registration of this club course needs permission of the instructor. Please return this form to Professor Chen: haijun.chen2016@gmail.com.
